 - d) 4 = Slightly better
 - e) 5 = Much better
- 8) Over the last year, how have job fared? (guesstimates are optional)
 - a) 1 = Significant layoffs (ask for guesstimate of total jobs gained or lost)
 - b) 2 = Some layoffs (ask for guesstimate of total jobs gained or lost)
 - c) 3 = No change
 - d) 4 = Some hiring (ask for guesstimate of total jobs gained or lost)
 - e) 5 = Significant hiring (ask for guesstimate of total jobs gained or lost)
- 9) Over the last year, have business opened or closed?
 - a) 1 = One or more closures (guesstimate number)
 - b) 2 = No change
 - c) 3 = One or more new businesses (guesstimate number)
- 10) Over the last year, how has the physical condition of the town changed?
 - a) 1 = Much worse
 - b) 2 = Slightly worse
 - c) 3 = No overall change
 - d) 4 = Slightly better
 - e) 5 = Much better
- 11) Please provide estimates for how much it would cost to fix your town's downtown
 - a) Streets
 - b) Buildings
 - c) Water system
 - d) Sewer system
- 12) What percentage of your town has high-speed internet?

- a) Enter percentage
- 13) How is HIS provided?
 - a) Satellite
 - b) Cable companies
 - c) Telephone companies
 - d) Other (specify)
- 14) Number of family doctors that are available
 - a) Enter number
- 15) Number of health clinics in your town?
 - a) Enter number
- 16) Number of dentists that are available?
 - a) Enter number

Survey Name: Member Story

Purpose: Ask Democratic Party members for stories that highlight social and economic issues.

- 1) Type of filing
 - a) Anonymous – No name is associated with the post. Its source is completely blank.
 - b) Person's contact info is recorded.
- 2) Can you be contacted about your post?
 - a) Yes
 - b) No
- 3) Issue category
 - a) Economics
 - b) Healthcare
 - c) Infrastructure
 - d) Education
 - e) Housing
- 4) Issue sub-category
 - a) Further breakdown
- 5) Key words (up to 5)
- 6) Brief description (120 characters or less)
- 7) Title (80 Characters)
- 8) Description Text description of the event(s) in narrative format.
- 9) AI Generated Summary (A click generates AI summary which the user checks)

- **Real-time condition reporting.** Clubs and members file structured reports on local conditions; AI summarizes responses into statistics, keyword indexes, and charts sliced by region and demographics. When something significant occurs, leadership is aware by the next morning — the organizational equivalent of Frito-Lay's supply-chain situational awareness.
- **Monthly club health reports.** Standardized monthly submissions track membership trends, meeting attendance, officer status, fundraising, and volunteer hours, giving county and state managers continuous visibility into club health without waiting for individual emails.

- **Personal impact stories.** A repository for member accounts of being mistreated by employers, health insurers, or medical providers — aggregated into testimony, talking points, and legislative evidence organized by issue and geography.
- **Position papers and issue surveys.** Committees and caucuses publish position papers and circulate surveys on specific policy topics; responses roll up automatically into summaries available to all relevant levels of the hierarchy.
- **Opposition monitoring.** A structured archive for collecting, tagging, and forwarding examples of Republican attack mail, misleading advertising, voter suppression activity, and campaign conduct that clubs encounter — searchable by type, geography, and target audience.
- **Shared website and calendar infrastructure.** A common backend server and toolset replaces thousands of separate club hosting contracts, cutting costs while giving every member and manager a unified view of club activities, presentations, and calendar events across the entire hierarchy.
- **Community and cultural knowledge base.** An internal social layer — modeled on a private Facebook — where members share information about their towns and regions: local economic conditions, policy impacts on residents, and cultural context (key historical figures, major employers, community landmarks) that candidates traveling through unfamiliar districts can draw on.
- **Member expertise directory.** A LinkedIn-style profile system where members list their professional capabilities, areas of knowledge, and availability for paid or unpaid support roles. Party and campaign managers at all levels can search this directory to find qualified advisors, subject-matter experts, and skilled volunteers on demand.

How-to library. An internal wiki and video library covering all club and campaign activities — canvassing scripts, GOTV procedures, fundraising, running a club meeting, filing resolutions — contributed and rated by members, so every club stops reinventing the same training materials from scratch.
